-Flyer and page layout design
-Photography

NAVY VETERAN
Gas Turbine Mechanic
9.5.2007 - 9.5.2011
- Managed maintenance schedules

Front-end web developer, Navy Veteran, and Ex Interior Designer recently earned a certificate in full stack web development from UNC Chapel Hill. With a background in design, and newly developed skills in Javascript, CSS, and HTML my goal as a developer is to create meaningful layouts and user experiences that come to life. I enjoy collaborating and working with a team of both right and left brained individuals, I believe this creates an environment made for constant learning. Communication and hard work are some of my biggest strengths, as well as my balance of friendliness and assertiveness. Seeking Entry Level Web Development opportunities where I can continue to grow and learn as a front-end web developer.

Skills & Qualities

- Creative Thinking
- Concept Development
